

Bringing history **alive**

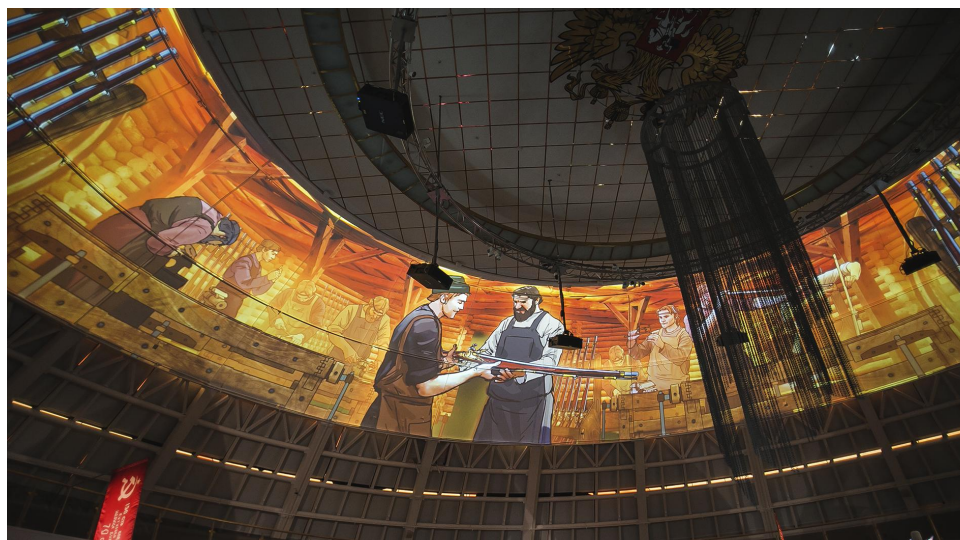

Multimedia museums

WE ARE IMMERCITY

We create **unique** multimedia museums to bring history **alive**

When you need the N°1
more-than-a-museum project
— you need Immercity

WHY

Due to evolution, "the digital gene" becomes the core of museums' DNA

That's why we integrate innovative solutions — to develop next-generation museums

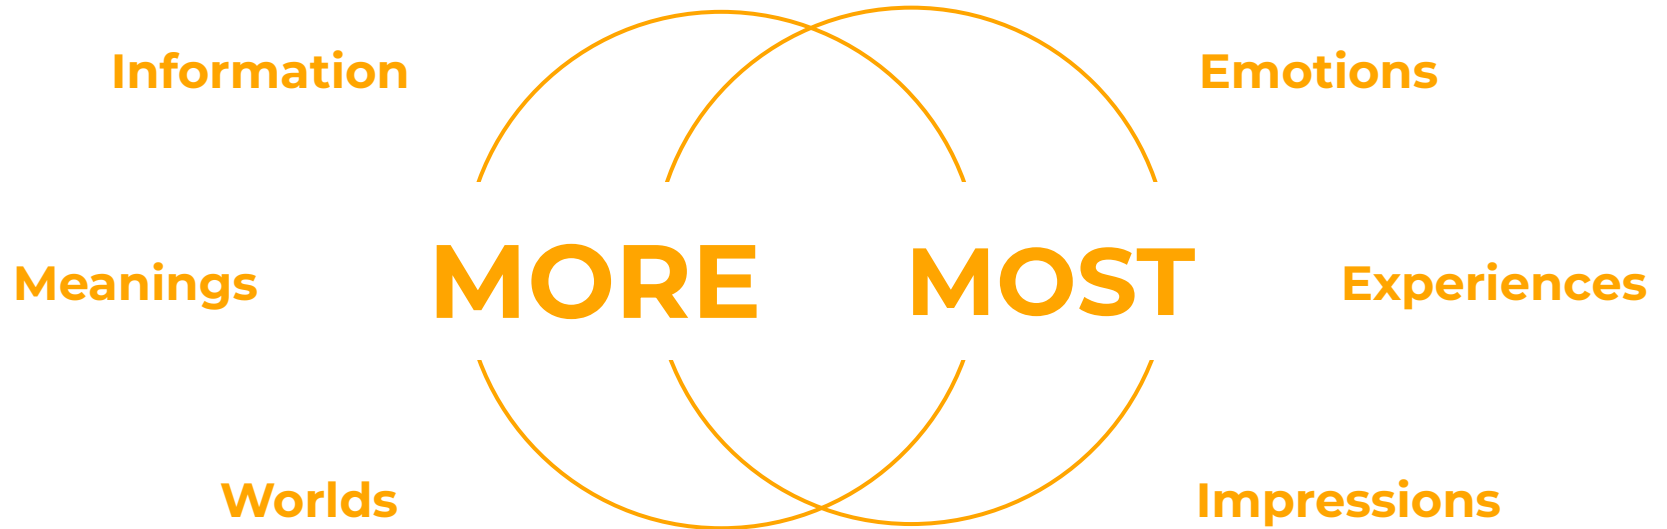

WHAT

The background is a dark space filled with a dense field of multi-colored stars (blue, green, yellow, white). In the center, a vertical column of planets is suspended: a large white planet at the top, followed by an orange planet, a smaller white planet, and a blue and white planet at the bottom. To the right, several zodiac symbols are visible: a crescent moon, a triangle with a cross, and a cross with a crescent. On the left, a large number '4' is faintly visible. The overall scene is lit with a soft, ethereal glow.

Multimedia provides an immersive multisensory experience. Let your visitors get an **epic near-real journey through time and places**

BENEFITS

Magic of technologies turns any space into borderless. So museums obtain two superpowers: **more** and **most**

EXPERIENCE

Our bespoke museums enlighten people by unique experiences. Ways to feel the pulse of alive history and interact with it:

EDUTAINMENT

education by entertainment
— works perfectly

PHYGITAL

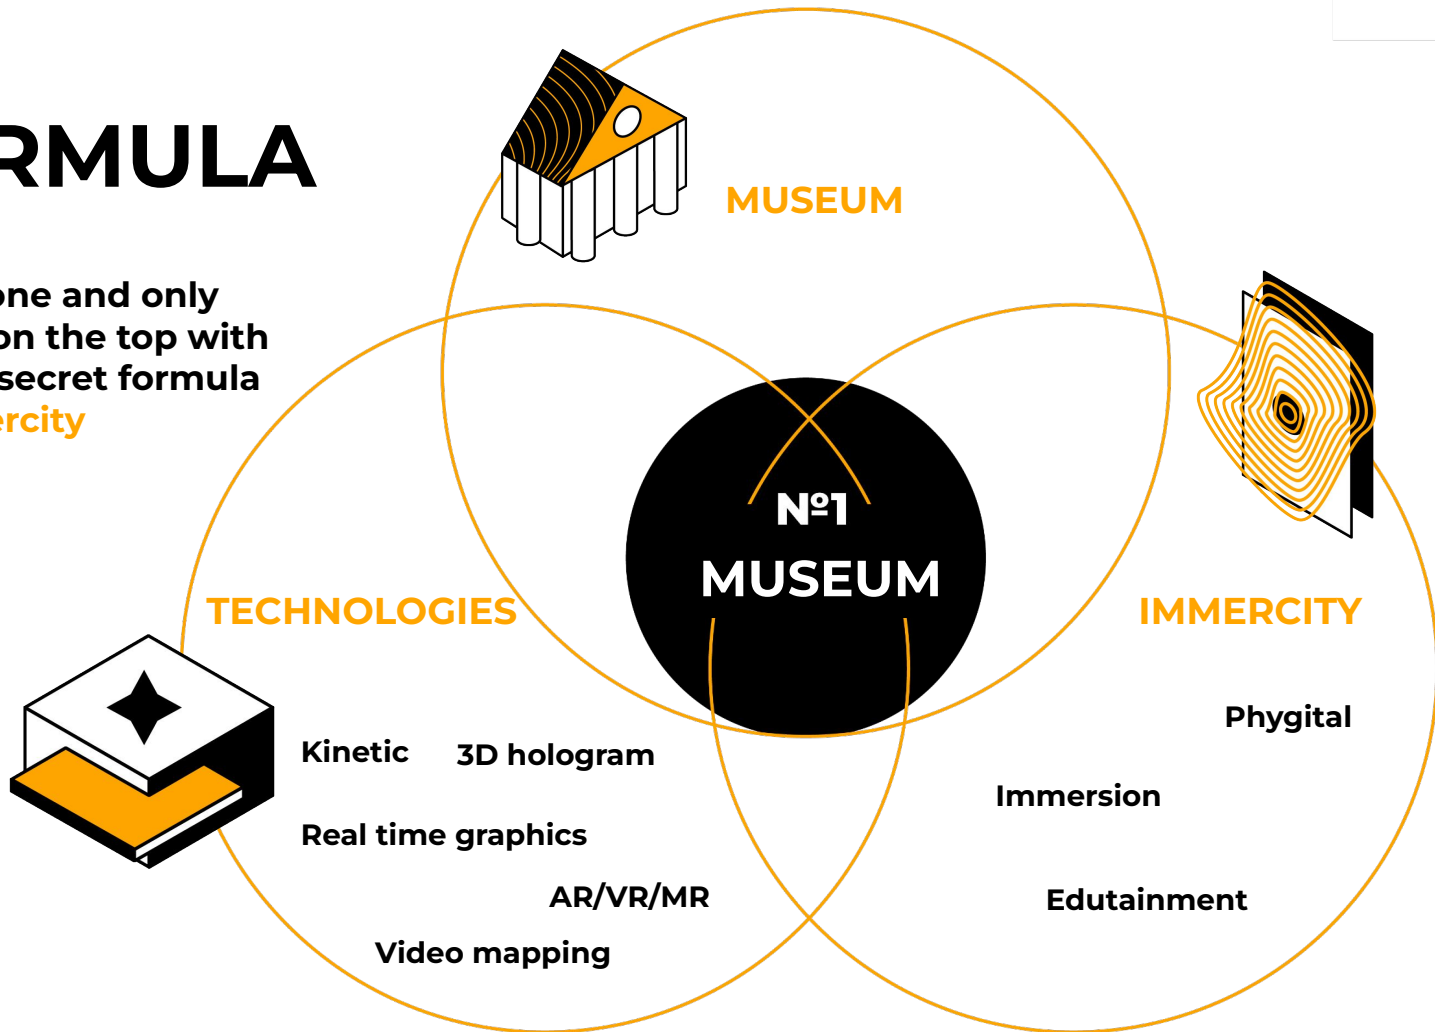

physical actions affect digital — to interact with history

IMMERSION

presence effect — provides emotional engagement

FORMULA

Be the one and only
and be on the top with
the top secret formula
— **Immercidity**

PROCESS

Созвездие Ориона

From a seed of an idea to plenty of visitors' "Wow", we follow the philosophy **"Step by step, side by side with clients"**

Step 1 CONCEPT

- Idea
- Storytelling
- Technologies
- Architecture
- Experience map

Step 2 DESIGN

- Documentation
- Estimate
- 3D modelling
- 3D virtual tours
- Tech tests

Step 3 INSTALLATION

- Construction
- Decoration
- Equipment
- Content
- Testing

VIRTUAL MUSEUM

We can widen your museum to
the virtual world
available for everybody
all over the world

CASES

Museum of Public Service

Museum of Impressionism

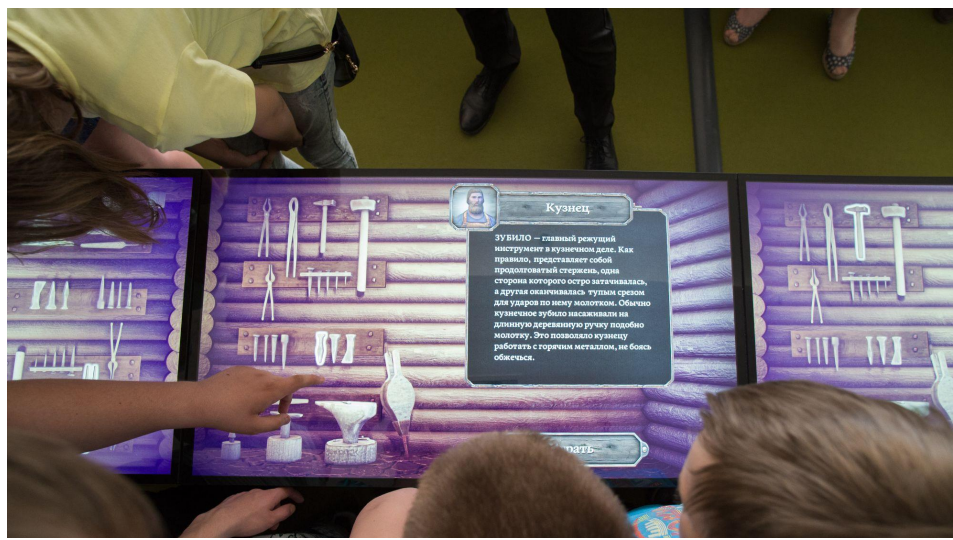

Museum of the New Year History

Urban Museum

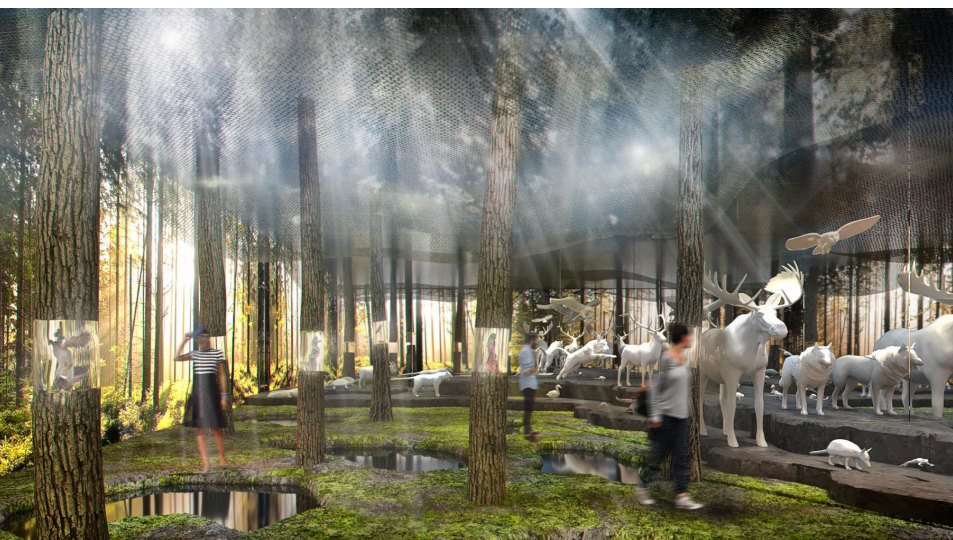

Children's Museum

CONCEPTS

A futuristic, golden, arched interior space, possibly a museum or exhibition hall. The architecture features high, vaulted ceilings with intricate geometric patterns and hanging lanterns. The walls are composed of large, arched panels that display vibrant, glowing digital content, including abstract patterns and a close-up of a human face. Several people are seen interacting with the environment: a man on the left is taking a photo with his smartphone, a woman and a man in the center are walking away from the viewer, a child is standing near a man on the right, and another woman is walking towards the right. The overall atmosphere is one of high-tech elegance and immersive digital art.
